

Reduces downtime - Keeps you swimming in the pool longer

Enzymes eliminate much of the need or use for traditional polymer-based water clarifiers

Low-foaming formula

Concentrated - a little goes a long way!

NaturCare® Enzymatic Pool Clarifier & Phosphate Remover is an effective product to use with AquaFinesse Pool Care Tablets in helping to control & eliminate biofilms that lead to Pink Slime, White Water Mold & Chlorine Demand.

Extremely effective to use when opening your pool. Makes openings faster & easier!

Works with any & all pool sanitizing systems - Chlorine, Bromine, Pristine Blue, Soft Swim, Baquacil, Nature2, Vision, Pool Frog, Sustain, ANYTHING & EVERYTHING!

How to Use NaturCare® :

Initial Start up: 12 oz per 5,000 gallons, then for normal conditions, NaturCare works great at a rate of only 2 oz. per 5,000 gallons weekly.

As a Pre-Party additive, to maintain good water quality during high use, use the standard dose above. Pool party goers will notice the nicer feel of the water on their skin & hair.

For the Most Effective Results: use NaturCare® Enzymatic Pool Clarifier & Phosphate Remover as a weekly regimen with

AquaFinesse Pool Water Tablets in order to prevent, control & eliminate swimming pool biofilms, White Water Mold, Pink Slime and other environmental waste.

Pool Enzymes.

What they are.

How to use them.

Important information for all swimming pool owners who want to treat the root causes of pool water quality issues.

"Make life simple. Make life better."

Enzymes: What they are & what they do...

Enzymes are special, naturally occurring (although there do exist man-made or synthetic enzymes) molecules that "eat" or "digest" organic waste that is not easily

filterable or can be readily oxidized.

Enzymes are nature's way to break down many organic compounds. You'll find enzymes in your own body! They break down fats, sugars. Insulin is a kind of enzyme.

Enzymes come in various "types" that are suited for specific jobs. The enzymes bind to the organic waste and chemically break the waste down. The final "waste of the waste" is carbon dioxide (CO₂) and water.

As you can imagine, turning organic waste in swimming pools into CO₂ and water is a great thing! Those 2 components are then reabsorbed back into the pool or spa water.

Your sanitizer (chlorine, bromine, biguanide, salt, etc.) can concentrate on its job - killing bacteria; oxidizers or shocks can do their job - oxidizing contaminants that cause chloramines; algaecides are not as stressed because algae is not being "fed" by these organics.

For pools equipped with an ionizer (Nature2 or Pool Frog), enzymes will keep the ionizing device much cleaner, thereby making it more effective.

NaturCare® Enzymatic Pool Clarifier & Phosphate Remover

ParPools.com has worked hand in hand with NaturePlus to develop the best (and most cost effective) Enzyme Cleaner/Clarifier & Phosphate Remover in the Pool Industry!

NaturCare® Enzymatic Pool Clarifier has the strongest concentration of enzymes found bar none!

When used regularly, enzymes consume or "eat up" swimmer & environmental contami-

nants & wastes (especially greases & oils) that otherwise consume a lot of your pool chemicals - chlorine, bromine, other sanitizers & shock treatments. Plus, it's proprietary formulation of an effective phosphate remover significantly lowers the possibility of summer algae problems (algae loves to feed on phosphates).

What makes NaturCare® different & better than other enzymes? NaturCare's "pure batch" formulae is just that - it's a pure batch of enzymes. No clones, not doctored, not colored or bleached. Just pure enzymes that are powerful, effective, concentrated & long-lasting.

NaturCare Enzymatic Pool Clarifier & Phosphate Remover is made from a "pure batch" process for the best enzymes available. You won't find any reconstituted enzymes in this product.

NaturCare Enzymatic Pool Clarifier & Phosphate Remover also helps to reduce the incidence of scummy waterlines that not only look bad, but are also a breeding ground for algae & other pool care problems.

All natural ingredients are safe for swimmers & the environment.

NaturCare Enzymatic Pool Clarifier & Phosphate Remover is Caleb approved for softer feeling water, hair & skin!

Non-toxic, does not contain dyes or other fragrances.

Helps keep filters (any kind) cleaner longer

All natural active ingredients

Environmentally friendly

Non-sensitizing (won't harm hair or skin)

Prevents many kinds of organic build up in & on pool surfaces

Helps extend cartridge filter life by consuming much of the "un-filterable" waste (greases, oils, make-up, lotions, etc) found in pools.

Significantly reduces the need for shocking & oxidizing

Broad-spectrum enzyme batch providing the greatest possible breakdown of unwanted bio-matter.
